Ephemerides. &c.

The INTRODUCTION.

ACCORDING to my Promise the last Year, I here present you with a Calculation *de Nove* for the present Year of our Lord God 1737; in which I have given you the true Times of the Nightly Rising and Setting of the Moon; a Thing very Useful for all Sorts of Men, especially to my honest Country Reader; telling him when he may have her borrowed Light to guide him in his honest Nocturnal Perambulations; M. signifies Morning, and A. Afternoon. I have also given you the Sign and Degree ascending at the Time of every Luration, as you will find them placed on the Top of the Right Hand Page; as for instance, *January* the 5th the Moon is at the Full 23' past 6 at Night, at the End of the same Line you'll find Δ 17°, which informs you that 17 Degrees of *Leo* is then ascending on the *Eastern Horizon* at the Time of that Full Moon, and so of all the rest.

The great Benefits, and Blessings, which we *English* have enjoyed in the last, and present Reigns (of our most Gracious Majesties King *George* the 1st, and King *George* the 2nd,) more then any other Nations of *Europe*, may very justly cause us, to render all possible Thanks and Praise unto Almighty God, for that it hath pleased God to confer and bestow upon us *English*, Peace at Home and Abroad, whilst very many Nations in *Europe* were under the Fury of the Sword, and labouring under the sad Effects of War, and sundry Calamities occasioned thereby. Moreover we have not only enjoyed Peace as aforesaid, but Plenty also; Wheat being (at the Writing hereof) sold at *Bear Key*, from 23 to 36 s. per Quarter, that is from 2 s. 10 d. $\frac{1}{2}$, to 4 s. 6 d. per Bushel, and other Provisions for Mankind, at moderate and reasonable Rates: We have laboured, and received the Fruits thereof, without Disturbance: Every Man hath sat under his own Vine, and eat the Fruit of his own Labour, in Peace and Quietness, whilst many of our Neighbouring Nations and divers Countries of *Europe*, have been (and at present are) molested with Armies, and busied and taken up in War, so that very few or none of them can say as we can ———
God continue Peace, and his Blessing among us, and give us grateful Hearts for Benefits received. ———

The Protestant Remembrancer continued.

UPON the whole Matter, when you have once put out your Eyes, and are grown to that Height of Unbelief, that you will neither credit your own, nor the Senses of all the Men in the World, and yet to that Height of Credulity that you can believe the rankest Contradictions. You are ther dip'd in the Preparative Blue for Popery, and in a fair Way to make an Als of yourself, that you may make a God of the Pope. Only remember, that St *John* had but Three of his Senses to vouch for Christianity, *viz.* Seeing, Hearing, and Handling, 1 Epist. chap. i. ver. 1, 2. And we have all five to prove the Truth of Protestantism, and Falshood of Popery.

II. Be persuaded to exercise your Reason, now and then in some of its most gentle and easy Skirmishes. We desire you not to vex it with sublime Notions, and high-flown Speculations, but to prove its Strength in some shallow Instances. Popery will teach you to believe, that Whole Christ is present in, and under every Crumb of the Consecrated Wafer, and then Whole Christ at one and the same Time must be at *Rome*, Whole Christ at *Paris*, and I doubt another Whole one too at *London*; of the Priest's own making: Now if you crumble this Whole one into a Thousand Particles, and then sub-divide each into Ten Thousand more, yet a Whole Christ is in, and under every one: And now I suppose an Ordinary Reason will satisfy you that one of these Christ may be hot in one Place, cold in another, moist in a Third, dry in a Fourth; Whole Christ may travel at the same Time, *East, West, North, South*, and towards all the Points of the Compass. And when once you have jaded your Reason, to blunder through such Impossibilities, you may soon stroke your self into a Belief, that an *Atheist*, a *Conjurer*, an *Heretick*, a *Murderer*, an *Adulterer*, may be the Infalible Head of the Universal Church; but 'till the Throat be wide enough to swallow such monstrous Gudgeons, you are in my Mind pretty well Antidoted against the Poyson of Popery.

III. Let me entreat you not to be so desperately enamour'd of the Gallows as to court a Hanging to save the Pope's Longing.

THUS great *Jehovah*, Man endows with Reason,
 To find a Time for every fitting Season.
 And he hath ordered in his wise Decree,
 And set a Time when every Change shall be.
 And through his wond'rous Providence hath giv'n,
 A Season to each Purpose under Heav'n.
 There is a Time for each Man to be born,
 And there's a Time for Earth to Earth to turn.
 To plant there is a Time, and there's a Time,
 To pluck those Plants up from the clammy Slime.
 To build there is a Season fit, and lo,
 There is a Season to demolish too.
 And there is sure a Time to make a Wound,
 So there's another Time to make it sound.
 There is a Time to weep and shed our Tears,
 A Time to laugh and lay aside our Fears.
 A Time of Mourning too, a Time (perchance)
 With Well-tun'd Musick for our Feet to dance.
 There's an appointed Season to chuse whether,
 To scatter Stones, or gather them together.
 There is a Time t'imbrace, and there be Spaces
 Of Time ordain'd, to refrain Embraces.
 To gain there is a Time, and Time likewise
 To lose what we have gain'd even in a trice.
 To hoard up Treasure, there's a Time to Day.
 To Morrow there's a Time to cast away.
 A Time's prefix'd, our Garments for to tear,
 And there's a Time Apparel to repair.
 A Time for Silence, and a Time to break
 Our Silence off, for there's a Time to speak.
 There is a Time to Love, a Time to Hate,
 For there's a Time Affliction to abate.
 A Time of War there is, and when to cease
 From War, there is a Time; a Time of Peace.
 Thus Heavens Decree to bound the Works of Men
 To do their Business, and undo again.
 Time was the Drum did beat up War at Hand,
 Time is (I hope) Peace will enrich the Land.
 Which rightly gain'd, who will not make his Choice
 Of Peace, sweet Peace! come let us all rejoyce.

WE Read in the Lives of the Saints, Page 179, that God said to *Abraham*, *He would visit his Posterity in the fourth Generation. Gen. 15, 16, and deliver them from the Captivity wherein they were.* This we may aptly say to all Mankind. For there are four Manner of Generations, viz. the First without Man and Woman, as *Adam* out of the Earth, the Second of Man without Woman, as *Eve* of *Adam's* Rib. The Third of Man and Woman as we are. Lastly, of a Virgin without Man, as *Christ* of the *Virgin Mary*, who conceived of him on *March 25th*, she was Mother of her Father, and Daughter of her Son;

*Behold the Father is the Daughters Son,
The Bird that built the Nest is hatch'd therein.*

And *Moses's* Rod that Budded, Blossom'd and brought forth Fruit without the Sap of the Earth, was a Type of her. All Civilized Nations observe one Day in Seven as a *Sabbath*, or stated Time of publick Worship.

The Christians keep their *Sabbath* upon the First Day of the Week, or *Sunday*, in Memory of *Christ's* Resurrection, that Smile of Heaven, and Joy of the World. The *Gracians* on *Monday*, the Day wherein the Firmament was Created, to separate the Cælestial Waters from the Inferior and Terrestrial. The *Persians* keep *Tuesday* for their *Sabbath*, the Day wherein the Waters, (which before covered the whole Element of Earth) were ranked in their Place: And the Earth appeared to become the Dwelling, Nurse, and Grave of Man. The *Affyrians* observe *Wednesday* for their *Sabbath*, in Memory of the Creation of the Sun, Moon, and Stars. The *Egyptians* observe *Thursday*, or the 5th Day of the Week, in Memory of the Creation of the Beasts, Fish, and Fowl; the Birds to fly in the Air, the Beasts to live on the Earth, and the Fishes to dwell in the lower Element, the Waters. The *Turks* observes *Friday*, or the 6th Day for their Day of Rest, in Remembrance of the Creation of Man, who was then appointed King and Governour over all other Creatures. The *Jews* observe *Saturday*, or the Seventh Day, for their *Sabbath*, which is the Day wherein God rested from the great Work of the Creation of the World.

*Nothing but Nothing had the Lord Almighty,
Whereof, wherewith, whereby to build this City.* Dubar

A Table of the Terms and their Returns for this present Year 1737.

Hilary-Term begins Jan. 24, ends Feb. 12

Returns or Essoign Days.	Exc.	Ret.	Ap.	W. d
In eight days of St Hilary, Jan. 20	21	22	24	Mond
From the day of St Hilary in 15 days 27	28	29	31	Mond.
On the morr. of Purif. of blest. Ma. Feb. 3	4	5	7	Mond.
In 8 days of the Purif. of the blest. Mary, 9	10	11	12	Satur.

Easter Term begins April 27, ends May 23.

From the day of Easter in 15 days, Ap. 25	26	26	27	Wedn.
From the day of Easter in 3 weeks, May 2	3	3	4	Wean.
From the day of Easter in one month, 9	10	10	11	Wea
From the day of Easter in 5 weeks, 16	17	17	18	Wedn.
On the morrow of the Ascension, 20	21	21	23	Mona

Trinity Term begins June 10, ends June 29.

On the morrow of holy Trinity, June 6	7	8	10	Frida)
In eight days of the holy Trinity, 13	14	14	15	Wedn
From the day of holy Trin. in 15 days, 20	21	21	22	Wedn
From the day of holy Trin. in 3 weeks, 27	28	28	29	Wedn

Michaelmas Term begins October 24, ends Nov. 28.

From the day of St Mic. in 3 weeks Oct. 20	21	22	24	Mond
From the day of St Mich. in 1 month, 27	28	29	31	Mona
On the morrow of All-Souls, Nov. 3	4	5	7	Mond
On the morrow of St Martin, 12	14	14	15	Tuesd.
In eight days of St Martin, 18	19	19	21	Mona
From the day of St Martin, in 15 days, 25	26	26	28	Mona.

N. B. No Sittings in *Westminster-Hall* on *Ascension-day* *Midsummer-day*, the 1st and 2d of *November*, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term, except *Trinity*, before which it opens but four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

January hath XXXI Days.

Rouse up my Muse, and tell what News thou hears
Amongst the Stars, and Motions of the Spheres;
Speak out and fear not, be it good or bad,
If't doth affront the *Turk*, 'twill make the *Papist* mad.
Mars now in *Taurus*, bids poor *Tague* beware,
Of Rogues and Cheats, for they will prove his Snare

April hath XXX Days.

As I was viewing of the spangled Sky,
I saw bright *Sol* conjoyn'd with *Mercury* ;
Chronus with *Venus* also doth combine.
But *Jove* against her, maliciously doth shine ;
Rain and dense Clouds arise t' obscure the Air,
But *Sol* and *Jove* in *Sextile* makes it fair.

May hath XXXI Days.

Here's three Conjunctions, one Square and one Trine,
Amongst the Erratic Stars this Month doth shine :
Some other Changes be ; which who would know,
May look old Anthors; I forbear to show
For few avoid, but many headlong run,
On Dangers ; which approaching none can shun.

B

June hath XXX Days.

Hold Saturn, hold, what means thou thus to do,
To vex great *London* with thy ugly hue:
Thou'lt lose thy Labour, Quarrels thus to pick,
A *Popish* Game will have a *Popish* Trick;
Ill Deeds have ill Success; and Men receive,
The like Reward in the same Plots they Weave.

July hath XXXI Days.

Venus thwarts Jove, and so doth Saturn too,
But smiles on Sol and Mars, what's here to do?
Apollo holds my Pen, lest I should tell;
He only say thus much, all is not well.
And I could wish my Friends in Peace or War,
Never presume to trust their Foes too far.

August hath XXXI Days.

Pity still your Harvest whilst bright *Sol* shines clear,
 And House your Corn: I see some Storms appear,
 If when the *Dog-Star* barks, you hear it Thunder,
 Then look for Showers: On God's Works let us ponder.
 Wise Men make use of Time, and potent Friends,
 Against a Foe who treachery intends.

September hath XXX Days.

All is not Gold that glitters, though the Sun,
Be joyn'd with Mars, 'tis Linsey Woolsey Spun;
Venus takes Mercury into her House,
And makes him inmate, 'tis not worth a Loufe,
He's a false Friend, and will become a Stranger,
And quite forsake thee, when thou art in danger.

	☉	☽	☿	♂	♂	♂			
12 11	oc.	☐	oc.	oc.	21	3	59	7 A 55	Here are no great matter of Aspects among the Planets this Month, save only the ☉ ☽ ☿ and ☉ ☽ ☿, & these signify Rapines, Murders, Duels; Quarrels do seem ripe in Mens minds, stirred up by some evil Spirits unto great Attempts: but a sober Magistrate prevents the disorderly People from Action, so that more then in Words and wicked Intentions, these hot Spirits rejoyce not. However, many receive Punishment either in Purse or Person, whereby a Calm follows. Serious Discoveries are made of the Male Intentions of some who may smart for their Follies.

October hath XXXI Days.

Strange News abroad, the Devil's now let loose,
Amongst the *Papist*, he has broke his noose :
Venus affronted, with *Jove* she now contends,
Saturn he courts her to his lustful Ends :
Alas! alas! I fear it is too true,
That honesty bids *Rome's* great Friends adieu.

December hath XXXI Days.

Now we have talk'd enough, the Sun declines,
'Tis time that I should finish all my Rhimes:
Venus and *Mars* are here together met,
And by the Fire-side are together Set,
Where they make merry with their *Christmas* cheer,
Farewel my Friends until another Year.

PARTRIDGE, 1737.

Astronomical Observations on the Year 1737.

Of the Brumal or Winter-Quarter.

WHich begins at such time as the Sun (apparently) enters the first Scruple of *Capricorn*, and falls this Year 1736, under the Meridian of London December 10. 22' 43" past 11 in the Forenoon, but the apparent Time is 23' 50" past 11 a Clock; at which Time and Place we have 8° of *Pisces* ascending, and 21° of *Sagittary* culminating; *Venus* and *Jupiter* in the twelfth, *Mars* and *Cauda* in the Ascendant, *Saturn* Retrograde near the Cusp of the third House, *Moon* intercepted in *Leo* in the 6, *Sun* in the 10, and *Mercury* near the Cusp thereof; *Mercury* in *Sextile* to *Jupiter*, and add to Time, *Mars*, mitigates the Evil intended by the Position of *Jupiter* and *Mars*, *Mars* in his own House intercepted in the Ascendant, and *England* Heroscope gives Boldness and Magnanimity to that People, so far as to take a Purse upon the Highway, for *Saturn* Retrograde near the Cusp of the 3d, denotes as much, viz. that many will be molested in their lawful Journeys from Place to Place. Within the Limits of this Quarter, we have a great and visible Eclipse of the Sun in *Pisces* the Ascendant of our Vernal Figure; *Portugal* seems to fall under the Lash, and furious Effects of this Eclipse those Idolatrous People will either in their Persons or Trade be Sufferers. *Mars* leaves his own House, and takes Possession of the *Hibernian* Territories at the End of the Year 1736; I am afraid some of those double Tongu'd Gentlemen will have a Mind to try their Skill on the Road with force of Arms, in turning Highway Collectors; this brings into my Mind, a Story that I have read of *Walter Tracey* robbing of *Ben Johnson* in *Fuckinghamshire*, which knowing the Poet, bid him stand and deliver his Money; but *Ben* putting on a Courageous Look, spoke to him thus:

*Fly Villain hence, or by thy Coat of Steel,
I'll make thy Heart, my Leaden Bullets feel;
And send that thrice, as thievish Soul of thine
To Hell to wear the Devil's Valentine.*

Upon which *Tracey* made this Answer:

Ans

P A R T R I D G E, 1737.

Art thou great Ben? or the revived Ghost
Of famous Shakespear? or some drunken Host?
Who being tipsy with thy muddy Beer
Dost think thy Rimes will daunt my Soul with Fear;
Nay know, base Slave, that I am one of those,
Can take a Purse, as well in Verse as Prose,
And when thou'rt dead, write this upon thy Herse,
Here lies a Poet who was robb'd in Verse.

The *Sun* squares the two Maleficks in *January* and *February*, *Mars* being in *Taurus* and *Saturn* in *Gemini*, much Discourse touching Martial Affairs, uncertain Fears and Reports, false Intelligence, much Quarrelling or strong Debates or Conflicts betwixt many People or Nations in the World, Murders, Robberies, Mutinies, Fights by Sea or Land are design'd by such malicious Aspects. The Days are now at the shortest, and the Nights at the longest to People inhabiting the Northern Hemisphere, and is no more than 7^h 34' at *London*; but at *Cronton* in *Lancashire* 'tis only 7^h 12,' and the Night 16^h 48' long. This is that Quarter which is naturally like to old Age, in which Man's radical Moisture (like Oyl in a Lamp) being extinguished, Death addeth a Period to his Days, like Winter storms which kill weak Herbs and old decayed Plants.

N. B. This Year we keep Easter according to its true Time, and on the same Day with the New Stile.

Of the Spring-Quarter

THE Spring begins at such Time as the Earth enters the first Scruple of *Libra* or (apparently) when the Sun toucheth the first Point of the Equinoctial Sign *Aries*, and continues while he passeth thro' *Aries*, *Taurus*, and *Gemini*; *Mars*, *Venus*, and *Mercury*, being chief Rulers thereof, the Days and Nights are now equal all the World over, except under the Poles. The Sun has now neither Right Ascension, Oblique Ascension, Declination nor Amplitude, but his Meridian Altitude at *London* is 38° 28', at *Cronton* 36° 38', and at *Rome* 48° 10': But the Moon's meridian Altitude, and other Planets differ much from that of the Sun's by Reason of the Obliquity of their

PARTRIDGE, 1737.

Orbs. See *Charles Leadbetters* Astronomical Works from whom we borrow all our Calculations. The true Time of this Vernal Ingress falls this Year 1737 at 26' past one o' Clock on the 9th Day of *March*, but the apparent Time is 7' 40" sooner, which I prove from the following Calculation,

	s.	o	'	"
Anno 1737, Sun's Long.	9	21	0	10
Correct Equation add	0	1	54	52
Sum Sub.	9	22	55	02

At which Time we have at *London* $10^{\circ} \frac{1}{2}$ *Leo* ascending, and 21° *Aries* on the Medium *Cœli*, *Saturn*, and *Mars*, conjoin'd in the Eleventh, in Square to *Jupiter* in the Eighth; *Venus* intercepted in her Night-house in the Tenth, *Mercury* near *Jupiter* in the Eighth, *Sun* and *Part of Fortune* in the Ninth; *Moon* in the Imum *Cœli* disposed of by *Mars*, all the Planets except Dame *Luna* are *Super Terra*, and *England's* Ascendent on the Cusp of the Tenth, these are good Positions in general, so that *England* seems to be in a flourishing Condition, but those Persons that have *Saturn*, *Jupiter*, or *Mars*, in their Nativities, will now, more or less, feel the dire Effects of their Conjunction and Square. For there are but few either by force of Nature or Education, but must submit in a great Measure to the Energie of Cœlestial Influencies; and altho' Stars do not absolutely necessitate the Will, yet they strongly incline it, that Effects of Nature are commonly seen beyond the Force of Education.

Thus every Planet in his kind,
Is to perform the Almighty's Mind.

This

P A R T R I D G E, 1737.

This Season is by Nature hot and moist, the most temperate Time of the Year, now the dull Senses of Man and other Creatures are quickned and revived, and therefore the Humours which do abound, and are readiest to oppress Nature, are fit to be emptied and avoided, whether by blood-letting, purging, or otherways, as the learned Physician shall advise,

*But how can he a good Physician prove,
That know not how Cælestial Bodies move.*

Of the Summer Quarter.

THE Summer Quarter begins this Year 1737 on Friday, June 10 32' 28" past Noon, according to the Tables of my loving and ingenious Friend Mr. Charles Leadbetter, the Calculation stand thus.

	s.	°	'	"
Anno 1737 Suns Long.	9	21	0	10
Correct Equation add			17	9
Sum Sub.	9	21	17	19
From Cancer or	3	0	0	0
Remains	5	8	42	41

Hours 0, Minutes 32 Sub.			1	18 51"
Remains				1 9
Seconds 28, Sub.				1 9
Remains				0

The Days are now the longest to all People on this Side the Equator, the Sun having now the greatest Meridian, Altitude, Declination, and Amplitude, the Day at London is 16^h 56' long, his Meridian Altitude or Height at Moon 61° 57', but at Cronton in Lancashire the longest Day is 16° 48', and his Height at Noon only 60° 7' and the apparent Time of this Solar Ingress is 1' 8" sooner, so that at London we have then 5° of Libra ascending, and 7° Cancer Culminating, Saturn and Venus conjoyn'd in Gemini intercepted in the 9th House Retrograde, Mercury Retrograde with Mars in the 10th, Jupiter in the 6th, and Moon in the 7th House applying to a Square of

C 3

Mercury,

PARTRIDGE, 1737.

Mercury Retrograde in the 10th this denotes some evil Hap to befall those Places and People under *Cancer*; *Jupiter* is in his own House *Pisces*, within the Orbs of a Square to *Saturn* in the 9th, intercepted and disposed of by *Mercury* R, these Positions are of ill import to those that travel beyond the Seas, and that many idle Disputes will arise about Religion, or Religious Matters, tho' *Sol's* Presence there may possibly abate the Evil intended by heavy heel'd *Saturn*. *Jupiter* strong in the 6th, shews the good Condition and State of Servants; but behold, I am afraid we shall hear of some fly Pimps being taken up for their Misbehaviour towards their Masters and Mistresses, for *Cauda Draconis* on the Cusp thereof denotes as much. The *Moon* signifies the Common People in general, and by being in the 7th (tho' out of all her Essential Dignities) promises many Marriages amongst the Common People, but many of them unhappy, by reason the *Moon* is weak. This Season, according to its proper Nature, is hot and dry, turning the Humours of Mens Bodies into hotness and dryness, resembling the Element of Fire, and Complexion of Choler, bringing all Fruits to their Ripeness, every thing flourishing in a most splendid and gay Order.

*Infections from the Stars may fall,
But one above doth stay them all.*

Of the Autumnal or Harvest-Quarter.

THIS Quarter begins at such time as bright *Pb* bus apparently enters the Equinoctial Sign *Libra*, and falls this Year 1737, on Monday September 12, 44' 39" past one a Clock in the Morning, which is proved thus:

	s.	°	'	"
Anno 1737 Sun's Long.	9	21	0	10
Correct Equation Sub.	0	1	55	17
Remains Sub.	9	19	4	53
From	6	0	0	0
Remains	8	10	55	7
September 11. Sub.	8	10	21	15

Hours 13. Sub.			32	2
Remains			1	50
Minutes 44. Sub.			1	48
Seconds 39				2

P A R T R I D G E, 1737.

The Days are now again equal to the Nights, and the Sun has neither Declination nor Amplitude, we have now 16° *Leo* ascending, and *Venus* upon the very Cusp thereof, and the very Beginning of *Taurus* on the *Midheaven*, *Saturn* in the 11 in *Time* to *Mercury* in the 3d, with *Sol* and *Mars* intercepted in *Libra*, *Jupiter* Retrograde with *Dragon's Tale* in the 8th, and *Moon* and *Caput Draconis* in the 2d House of Heaven, *Part of Fortune* in the 12th, thus are the Heavens posited at this Solar Ingress, the Fruits of the Earth are increased and ripened: this Season is by Nature cold and dry, therefore the Sanguine are now best in Health, and the Melancholly subject to Dislemper, best for Youth, but worst for Age. As here is no less than three Planets in the third, viz. *Sun*, *Mars*, and *Mercury*, gives many troublesome inland Journeys, by Reason of Thieves and Robbers, *England's* Sign is intercepted in the 9th, and *Mars* Lord thereof denotes dangerous Voyages at Sea, great Complaint of foreign Trade, *Jupiter* has Signification of Churchmen, he is Retrograde and just past *Cauda Draconis* shew Scandal or Disgrace to some in Power, but he being in his own House denotes, as if the Aspersions thrown upon him would vanish all in Smoke, and he again appear above the Frowns of Fortune; *Saturn* moves slowly in *London's* Sign, and on the 27th of *September* becomes Retrograde, and continues so all the rest of the Year, he is in the 11th House in the Scheme, he pretends Friendship, but not to be trusted, *Mercury* who disposes him is also in *Time* Aspect to him, the greatest Knaves generally carry things on with the smoothest Face, and sweetest Words, the Nights do now lengthen apace, which I am afraid will give Opportunity to the wicked lurking Thief to step out of the dark Corners of the Streets to molest and plunder the good honest and well meaning Subject, but we hope justice will overtake them, so leaving all to Time, I conclude.

*And thus the Stars, if God assent,
Whose Power alone can all prevent.*

With bended Knees both of Soul and Body, let
all true hearted Subjects pray for the Safety and
C 4 Preservation

PARTRIDGE, 1737.

Preservation of the Person, Life, Crown and Dignity, of our most gracious Sovereign King *George II*: by the Grace of God, King of *Great Britain, France and Ireland*, Defender of the Faith, &c. and in all Causes, and over all Persons, as well Ecclesiastical as Civil, within these his Dominions, next and immediately under *Jesus Christ* supreme Governor, &c. Who is the very Breath of our Nostrils: That God would vouchsafe to shower down and multiply his Blessings upon the illustrious House of *Hanover*, and all the Royal Family; that God would endow them all with all heroical Virtues and spiritual Graces, which may make them fit for those Places for which he hath ordained them; that God would direct with Wisdom and Piety all the Honourable of his Majesty's Privy Counsel, and bless all the Reverend Fathers of the Church, that he would indue all the Nobles and Gentry of the King's Dominions with Fortitude, Courage, and Loyalty, and all the grave and Honorable Judges, Right Worshipful Justices, and other inferior Magistrates, with the Knowledge and Conscience of Equity, Justice and Right: All the Ministers of the Word with Ability of Gifts, and conscionable Care and Diligence in the Lord's Harvest: And all the Commons with peaceable, loyal and religious Minds and Affections; that God would hold back the Judgments we have deserved, and continue and increase upon us and our Posterity, his undeserved Mercies bodily and spiritual to his own Glory, and the temporal and eternal Comfort of us all, thro' our princely Saviour *Jesus Christ*. Amen.

A Dram of Goodness is better than a World of Greatness. He that doth get doth much, but he that doth keep doth more. Man may purpose on Earth, but God disposeth in Heaven.

Of the Eclipses which will happen in 1737.

Within the Perimeter of this Year, there will be four Eclipses of the two great Lights of Heaven, viz. two of the *Sun*, and two of the *Moon*; and they happen at *London* in the following Order.

The

P A R T R I D G E, 1737.

The first will be a great and visible Eclipse of the Sun on Friday February 18, in the Afternoon, according to the following Calculation.

App. time at Lond.	D. H. ' "				
Begin. 1737. Feb.	18	2	18	36	} P. M.
Middle		3	42	0	
Visible Conjunction		3	42	43	
End		4	59	7	
Total duration		2	40	31	
Digits Eclipsed	10	22	17		

And the Times of the General Eclipse happens thus:

App. time at London of the	D. H. ' "				
Begin. of Eclip. 1737 Feb.	17	23	26	25	} P. M.
Begin. Central Eclipse	18	0	48	46	
Ecliptic 8 in Nonageffima		2	7	51	
Middle		2	15	35	
Meridional Sun Centrally		2	40	8	
End Central Eclipse		3	42	24	
Full End of the Eclipse		5	4	45	
Duration of Central Eclipse	2	53	38		
Total Duration Eclipse	5	38	20		

The Sun is Centrally Eclipsed at his Rising in the Lat. of 9° N. and Long. from London 80° West, near *Portabello*; he riseth Centrally Eclipsed in the Gulph of *Mexico*, and is Centrally Eclipsed in the Nonageffima Degree in the *Atlantic* Ocean, between the *Azores* and *Bermudas*, and in the Lat. 38 North, and Long. 40 West, he will be seen Centrally Eclipsed in the Meridian, the Sun will set Centrally Eclipsed in *Muscovy*, a little to the East of *Petersburgh*.

And lastly, the Sun will set as the Eclipse ends in the North Part of the *Mediterranean* Sea, bordering on *France* and *Italy*, Lat. 42° North, and Long. 7° East. The Sun's Upper is touched by the Moon's Lower Limb in the Meridian, in the Ocean North of *Brazil* in *America*. This Eclipse will not be any where Total but Annular; that is, there will be a Ring of Light all round the Sun's Body, which will be a very beautiful Sight to all such as shall have the Happiness of seeing it. The Central Shade enters on the Globe in the Northern Parts of the Gulph of *Mexico*, and travels with a Velocity of near 32 Miles in a Minute,

P A R T R I D G E, 1737.

Minute, North Easterly 8340 *English* Miles, into *Muscovy*, where it will leave the Earth; the Breadth of the Shadow is 5629 Miles. The Eclipse itself falls in the 7th House, where we also find *Jupiter* and *Mercury* Retrograde, in Square to *Saturn* in the 10th, where we also find *Mars*, *Leo* ascending, and *Sun* Lord thereof; *Venus*, *Mars*, and *Saturn* may be all seen Westward after Sun-set, *Jupiter* and *Mercury* being Combust, signifies such Persons as have them in their Nativities to be under a Cloud, and labouring under such Difficulties as may tend to their utter Disgrace.

The second Eclipse is of the lesser Luminary the *Moon*, and invisible; it happens on Saturday the 5th day of *March*, 15th past Four in the Afternoon, in 16° of *Virgo*. 'tis but a small Eclipse, where our Antipodes may behold about one third of the *Moon's* Diameter obscured on the South-Side. The Third will be a Solar Deliquium, on Monday the 15th Day of *August*, 11th before one a Clock in the Morning, it will not be seen of us in *England*, because the Meridian is removed so far to the Eastward, it will be seen by our Southern Navigators, it falls in 3° of *Virgo*.

The fourth and last Eclipse this Year is upon Monday *August* 29, in the Morning, according to a former Calculation of mine.

	<i>D. H. ' "</i>
Beginning 1737, August	28 14 34 0
Middle, or greatest Darknss	15 44 0
True Eclipse &	15 52 0
End of the Eclipse	16 54 0
Total Duration	2 20 0
Digits Eclipsed are	4 34 on the up- per Side

Lat. *Moon* at { Begin. 38 50 } S. A.
 { End 45 2 }

This Eclipse falls in 16° *Pisces*, within the Bounds of the 8th House near the Body of Retrograde *Jupiter* in Opposition to the *Sun*, *Saturn* in the 10th,
in

PARTRIDGE, 1737.

in Square to *Mars* in the 2d, where *Mercury* is also seated, *Venus* is our bright Morning Star on the Cusp of the 12th, no less than 44° distant from the *Sun*, *Leo* ascending, and *Taurus* culminating, thus are the Heavens posited at the Time of *Lunar Deliquium*; it falls in the House of *Jupiter*, and the Retrograde, seems as if some topping Gownsmen were like to meet with Disgrace, the *Moon* signifies the common People, it is possible we shall hear of the Disobedience of many Wives to their Husbands, and Servants wronging their Masters, but let them beware, the Reward of such vile Practices, is either a Halter, or the sight of some foreign Country. Many Marriages amongst the Commonalty seem to be on Foot, but the Square of *Saturn* and *Mars*, and the Opposition of the *Sun* and *Jupiter* are like to give great Uneasiness to many that enter into that Yoke, which puts me in Mind of the old Proverb, viz. Marriage is like a Cage, the Birds without despair to get in, and those within despair to get out.

The great Conjunctions of great Stars

The Eclipse of Sun and Moon,

Doth threat great Death, great Dearth and Wars

If we repent not soon.

Now God above, and Wrath above;

And Heaven above relent:

And Man beneath and Sin beneath,

And Earth beneath repent.

And Moses stretched forth his Hand towards Heaven;
and there was a thick Darkness over all the Land of
Egypt three Days. Exodus x. 22.

For the Stars of Heaven and the Constellations thereof
shall not give their Light, the Sun shall be darkned in his
going forth, and the Moon shall not cause her Light to
shine. Isaiah xlii. 10.

Besides these Eclipses of the *Sun* and *Moon*, there will be a near Appulse of the *Moon* to *Venus* on Sunday January 23, at 26' past 10 in the Forenoon, it will

PARTRIDGE, 1737.

will not be visible in *England* by reason it happens in the Day-time, the Conjunction is made in *Pisces*, $23^{\circ} 36'$ the Lat. of *Venus* $0^{\circ} 47'$ S. D. and of the *Moon* $26'$ S. A. the *Moon's* Diameter is then $29' 52''$ and her horizontal Parallax $55' \frac{1}{2}$ her Parallax in Lat. $55'$. The *Moon* will pass very near *Jupiter*, *June* 8, *July* 5, and twice in *August*, as noted in the Almanack, but will pass wide of *Mercury*, *Mars*, and *Saturn*, all this Year. There are more than 20 of the fixed Stars that lye in or near the *Moon's* Way this Year, but they being all small, will scarcely be seen by any but only such as are watchful, and take Delight in Telescope Observations. *Saturn's* Ring is now at its greatest opening. There are no less than five notable Conjunctions of the Planets this Year, the first is of *Mars* and *Saturn*, on Sunday the 6th of *March*, they are Evening Stars, and may be seen W. N. W. after Sun set, *Mars* will be elevated above *Saturn*, pleasant to behold; this Conjunction is made in 6° *Gemini*; had I Time and Room I could write a Volume of the Effects of the Conjunctions this Year (as *Richard Edlin* did of the Conjunction of *Mars* and *Saturn* in *October* 1658) The second is a Conjunction of *Venus* and *Saturn* in 9° *Gemini* on the 2d Day of *April* *Venus* has $3^{\circ} 52'$ North Lat. and *Saturn* $1^{\circ} 31'$ S. by which I see *Venus* will be elevated $5^{\circ} 23'$ above *Saturn*, and *Mars* is also in view to the East of them.

The third is also a Conjunction of *Venus* and *Saturn*, she being Retrograde meets her old Paramour in 17° *Gemini*, she has now $3^{\circ} 3'$ South Lat. and *Saturn* $1^{\circ} 24'$ S, here *Saturn* is elevated above her $1^{\circ} 39'$, they are Oriental of the *Sun*, and under his Beams consequently cannot be seen. They meet a third Time on *July* 15, in *Gemini* 22° , at 3h P. M. *Saturn* is elevated above *Venus* $3^{\circ} 25'$, she may be seen in the Morning before Sun-rise pleasant to behold. The Effects of this triple Conjunction of *Saturn* and *Venus* in *Gemini*, will be showered down upon those Places subject to the Sign, and Persons that have them conjoyn'd in their Nativities; many unequal Marriages will be performed to the great Prejudice of those whole

PARTRIDGE, 1737.

whole Lot it is to be so unhappily yoked. And here I shall give my Reader an Account of the *Indian Pagans* burning their Widows alive with the Bodies of their deceased Husbands, and the Relation, as I received it from a Friend at *Bengal* is this. I cannot (says he) forbear writing you an Account of a Woman whom I saw burnt but a few Days ago with the Corpse of her Husband, I was present at the whole Ceremony, with several other *English* Gentlemen. She accompanied the Corpse to the Pile singing, and holding a green Bough in each Hand. At her Arrival the Bramins gave her Rice and Sweet-meats, of which she eat greedily and plenty. She talked composedly from Time to Time with some of her Relations, often smiling, and sometimes laughing decently. When she had done eating she distributed the Remainder among the People, which they carefully preserved. She talked to different People; and obliged some among them who were at Variance, to join Hands and be reconciled. She had three of her Sons present, but seemed to take no more Notice of them than the rest of her Friends. At last some Women appointed for the Ceremony, anointed and painted her, after which she went three Times round the Pile, singing and bowing every Time she came to the Head of the Corpse, then mounted with a great deal of Gaiety, and laid down by it, putting her Arms about the Neck and hugging it closely. She was covered with some dry Wood, her eldest Son with a Torch in his Hand went likewise three Times round the Pile praying and bowing, and put a Torch to her Nose every Time he came to her Head. At last he set Fire to the Pile, which took the Flame gradually; I protest she never stir'd one of her Limbs, nor uttered the least Groan or Complaint, while she was consumed in the Flames. N. B. This Ceremony seems to have been somewhat altered since *Tavernier* was here, who gives this Account of it. The Woman used to accompany the Body of her deceased Husband to the Ganges, where they are both washed. Then she danced up to the Funeral Pile with the Matlick of Drums, Flutes, and Hautboys, and placed herself

P A R T R I D G E, 1737.

herself upon it as if she was sitting upon her Bed, then they laid her Husband's Body across hers, after which her Friends gave her Letters pieces of Callicoe, or some Bits of Silver or Copper to deliver to their Friends in the other World. When they had all done, the Woman asked the Standards by three Times, if they had any more Service, if they made no Answer, she tied up all the Tokens with a Piece of Taffeta, put them in her Pocket, the Fire being put to the Pile, she was consumed (along with her Husband's Corpse) to Ashes.

Query. Why should Eternity punish that which is committed in Time and oftentimes but a short Time?

Answer. First, because the Sin, tho' it be committed in Time, is against an infinite Majesty. Secondly, because God judges according to the wilful Inclination of a Sinner, that would sin eternally, if he might live eternally; and to this indefatigable bent of Wickedness, God answers him with everlasting Punishment. For as a Father saith, *Pecat Homo in suo aeterno, punis Deus in suo aeterno*: Man sins in his Eternity, and God punishes in his Eternity. The Princess of Wales came to St. James's Palace, April 27, at 11 30' P. M. exactly, 1736. As I my self was an Eye Witness.

The following Table is of excellent Use to Astronomers, in shewing them the Position of *Jupiter* Satellites which are here inverted, as they really are when viewed through two Convex Glasses. Sept. 1. at nine at Night, the first and third are to the Right Hand of *Jupiter* near together, being only 1 half a Semidiameter of *Jupiter's* Body distant from each other; the 2d and 4th are to the Left Hand: The Figures on the Right Hand the Dot are Decimal Parts.

PARTRIDGE, 1737.

ADVER-

ADVERTISEMENTS.

DR. Partridge's Night Drops, Night Pills, *Matthew's* Pill, and his other Medicines of his own preparing, continue to be sold as before by his Widow, at the *Blue Ball* in *Salisbury-street* in the *Strand*.

ARTIFICIAL TEETH, set in so firm as to eat with them, and so exact, as not to be distinguished from Natural: They are not to be taken out at Night, as is by some falsely suggested, but may be wore Years together: Yet are they so fitted, that they may be taken out and put in, by the Person that wears them, at Pleasure; and are an Ornament to the Mouth, and greatly helpful to the Speech. Also, Teeth cleaned and drawn, by *John Watts* and *Samuel Rutter*, Operators, who apply themselves wholly to the said Business, and live in *Raguet Court, Fleet-street, London*.

STEEL Trusses for Ruptures, Bag-Trusses for fixed Tumours, Back Irons, and other Instruments for the Lame or Crooked: By *Peter Bartlett*, Steel Truss-Maker to the Chest at *Chatham*, for the Help of his Majesty's Seamen; at the *Golden Ball* in *S. Paul's Church-Yard, near Cheap-side, London*.

Persons in the Country, lending their Bigness, and which Side the Rupture is, may be supply'd with the Trusses, and proper Directions.

His Mother, *Mrs. M. Bartlett*, at the *Golden Ball* in *Fleet-street, near Fleet-Bridge*, is skilful in this Business to her own Sex.

Printed for *T. LONGMAN*, at the Ship in
Paternoster-Row.

A New Practise of Physick; wherein the various Diseases incident to human Bodies are orderly described, their Causes assigned, their Diagnosticks and Prognosticks enumerated, and the Regimen proper in each delivered; with a competent Number of Medicines for every Stage and Symptoms thereof, prescribed after the Manner of the most eminent Physicians among the Moderns, and particularly those of *London*; the whole formed on the Model of *Dr. Sydenham*, and executing the Design of his *Processus Integri*, in Two Volumes, Octavo. By *PETER SHAW, M. D.*
